

SAVE Air Handling Units

Crisp, fresh, and clean air for every home.

[Find more details in our online catalogue](#)

Unlock even greater efficiency

SAVE AHUs come with different heating and cooling recovery methods. Allowing you to further boost the energy efficiency of your units, wherever they're installed.

Performance you can rely on

Our heat exchanger systems automatically regulates the heat/cool recovery and has automatic defrosting functions. Your SAVE AHUs will keep you comfortable inside, no matter the weather on the outside.

For buildings big and small

Whether you're building a new home or renovating an apartment block, SAVE air handling units are a perfect match for any indoor spaces up to 550m².

Health and safety first

SAVE air handling units are Eurovent certified and ErP compliant, easy to service and maintain. So you can relax – knowing the air you breathe is clean and pure.

Full control, from anywhere

All SAVE units come with SAVE Control – multiple, easy-to-use interfaces that let you communicate with your AHUs wherever you are.

Certifications

Ecodesign (ErP) compliant

Complies with stringent EU regulations on energy labelling and Ecodesign for Sustainable Products (ESPR) and Energy-related Products (ErP). Ready to meet future requirements.

Eurovent Certified Performance

Eurovent Certified Performance is the global benchmark in HVACR certification. The mark guarantees that this product performs as advertised. Check the ongoing validity of our certificates in the Eurovent Certified Products Directory.

Green Ventilation

Our proprietary environmental performance benchmark guides you towards the most sustainable solutions within our portfolio. Only products that meet a clear set of verifiable minimum requirements—covering aspects such as energy efficiency, indoor air quality, and safety—are eligible to carry the Green Ventilation™ label.

Technical parameters

Unit		
Frequency	50;60	Hz
Voltage (nominal)	230	V
Phases	1~	
Recommended fuse	10 A	
Enclosure class	IP24	
Speed regulation	Stepless	
Product type	Heat recovery unit	
Temperature	-20 to 40	°C
Motor type	EC	
Supply fan		
Input power (P1), supply fan	169	W
Supply air filter		
Filter class, supply air	ePM1 60%	
Return fan / Extract fan		
Input power (P1), extract fan	169	W
Extract air filter		
Filter class, extract air	ePM10 50%	
Heater		
Heater type	Electric	
Preheater / Reheater		
Input power, reheater	1.67	kW
Exchanger		
Heat exchanger rotor drive type	Variable speed	
Heat exchanger	Rotating	

Others

Fan control	Stepless voltage control
Installation type	Vertical
Supply side	Left

Color casing

Color casing	White
Color casing, RAL	RAL 9010

Specification

Filter kits:

246659 PF STD kit (F7/ePM1 60% supply and M5/ePM10 50% extract)

317696 PF OPT kit (accessory) (F8/ePM1 70% supply and M5/ePM10 50% extract)

SAVE residential ventilation unit is perfect for ventilated areas up to 300 m².

Take control of your SAVE residential ventilation unit with the user-friendly **SAVE CONNECT** app. Adjust and manage your unit remotely, making home ventilation simpler and more convenient than ever.

Rest assured, the SAVE unit comes with the **SAVE CONNECT** module included, putting remote control firmly in your hands.

MAIN FEATURES

- High energy-efficiency rotary heat exchanger with EC technology fans
- Demand control regulation with the built-in humidity sensor
- Moisture transfer function to minimize condensation in supply air during wintertime
- Remote control via the SAVE CONNECT app
- Built-in electric heater
- Optional SAVE TOUCH and SAVE LIGHT control panels
- Local control and configuration via WEB interface
- Connection board for easy access and connection of accessories
- Modbus communication RS-485 as standard
- Cookerhood connection
- Eurovent Certification

EXPAND YOUR CONTROL WITH ADDITIONAL PANELS

You can choose and buy these panels separately, adding more convenience to your setup.

- **SAVE LIGHT** – control panel for basic functions to keep things simple and easy. You can control the airflow, get alerts for general alarms and filter changes.
- **SAVE TOUCH** – Take it up a notch with the SAVE TOUCH panel. It has a touch screen that lets you control everything and mirrors functionality of the SAVE CONNECT app. You can see info like airflow, temperature, and air quality. Each control method is optional and have to be ordered separately as an accessory. A six meter cable for the external control panel connection is already included with the unit.

SIMPLE INSTALLATION SOLUTIONS

SAVE unit should preferably be mounted on a wall in a separate room (e.g. storeroom, laundry room or similar). Left and right handed models are available. Our external connection board comes ready with prewired inputs and outputs, making it a breeze to set up external sensors, heaters, coolers, and more. Embrace hassle-free installation and harness the power of customization.

Connection to an external cooker hood is available on the top of the unit. This makes the unit well suited for apartment buildings where the extract air from the cooker hood is challenging. The extract air from the cooker hood is by-passed, hence the heat exchanger is not exposed to extract air from the kitchen.

KEY COMPONENTS

The unit comes with a built-in electric heater.

The built-in humidity sensor in extract air can be used for demand control.

The unit features sturdy double-skinned panels. Maintenance is effortless with easily removable components.

White painted double skinned panels.

The unit is equipped with a high efficiency variable speed rotating heat exchanger and a moisture transfer function that regulates the rotation speed of the rotor. Energy efficient fans with EC motors as well as low-pressure filters reduce the energy consumptions and ensures low SFP factor (Specific Fan Power) and sound level.

The built-in humidity sensor in extract air can be used for demand control.
